

Smarter meeting spaces. Better outcomes.

Empower teams with purpose-built tools—video, cameras, whiteboards, and more—that turn any room into a collaboration space.

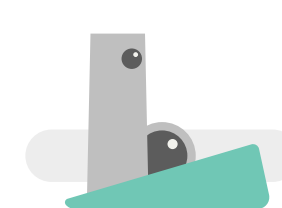

The Logitech advantage: empowering seamless collaboration

Logitech room solutions simplify collaboration with award-winning hardware, smart management tools, and a deep commitment to sustainability. Designed for consistency and ease of use, they help teams stay productive wherever they're working while reducing IT complexity.

Technology simplified

We initially looked at Logitech because they're a leader in the space and they've been in the industry a long time. Their peripheral products, like mice and keyboards, have always been very high quality and reliable. We believed that Logitech would bring the same quality and effort to our AV platform, and we were right.

Jerry Johnson,
Director of Infrastructure Services at
Neiman Marcus Group (NMG)

Management simplified

HQ project kicked off last year [2024] was huge success, we had a number of spaces and challenges we had to solve for... Logitech focus on simple, smart and sustainable align perfectly with... [our] approach. We want our rooms to be simple to manage... support... use... Smart... want to walk in and hit a button. Sustainable, recycled products fit perfectly within that.

Director, Unified Collaboration Programs
at Baker Hughes

Collaboration simplified

[Our] vision is to promote productivity and remove complexity for the users. Logitech has been a wonderful partner in finding solutions that scale and promote these types of initiatives.

The power behind seamless collaboration

Intuitive, human-first experiences

Employees can start meetings quickly and collaborate without friction, whether in the office, at home, or on the move. Logitech products are designed with users in mind, making technology approachable and comfortable.

Scalable solutions for global businesses

Today's companies operate across borders and locations. Logitech solutions are designed to make deployment and scaling easy, supporting businesses in their global growth.

Consistent user experiences everywhere

With Logitech, employees enjoy the same interface, simplicity, and quality across all environments—whether at their desk or in a meeting room—eliminating variability and ensuring seamless collaboration.

Sustainability at the core

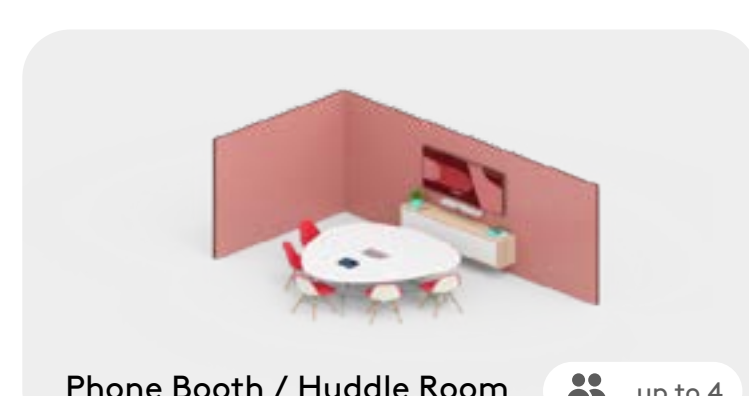

Through thoughtful design, extended product lifecycles, and innovative use of software, Logitech not only delivers exceptional technology solutions but also embodies a commitment to sustainability.

Take your first steps toward smarter spaces

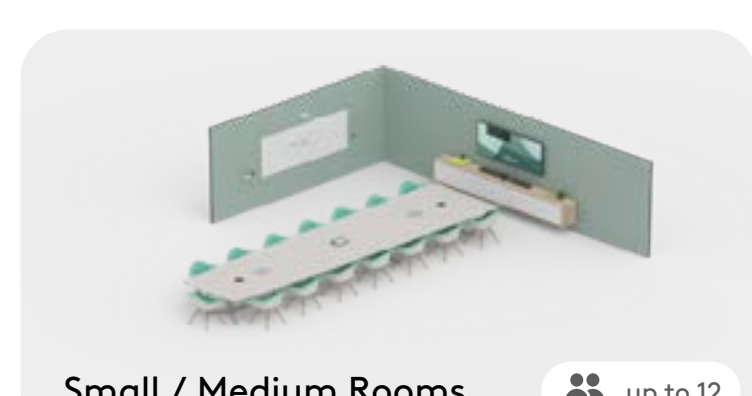

START

Transforming collaboration doesn't mean starting from scratch or overhauling everything at once. Our Logitech partnership makes it easy to follow a proven path: start small, customize each space to meet your needs, and scale at your own pace, delivering measurable impact every step of the way.

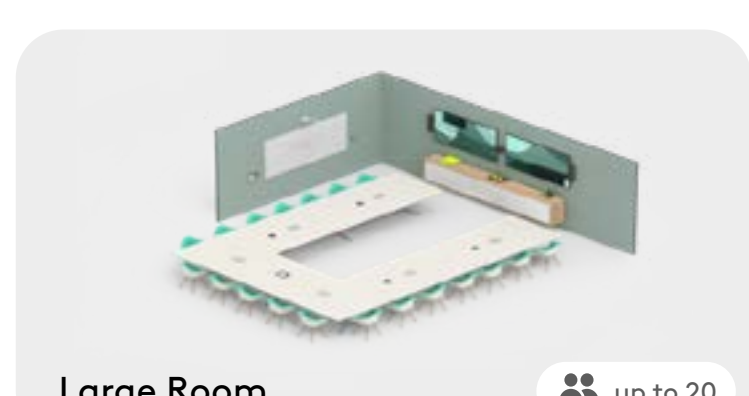

Identify the space, along with the primary video conferencing platform and preference on appliance vs. compute.

Phone Booth / Huddle Room up to 4

Small / Medium Rooms up to 12

Large Room up to 20

Ideation Space / BYOD

Microsoft Teams ZOOM Google Meet

STEP 1

Start strong with seamless video collaboration

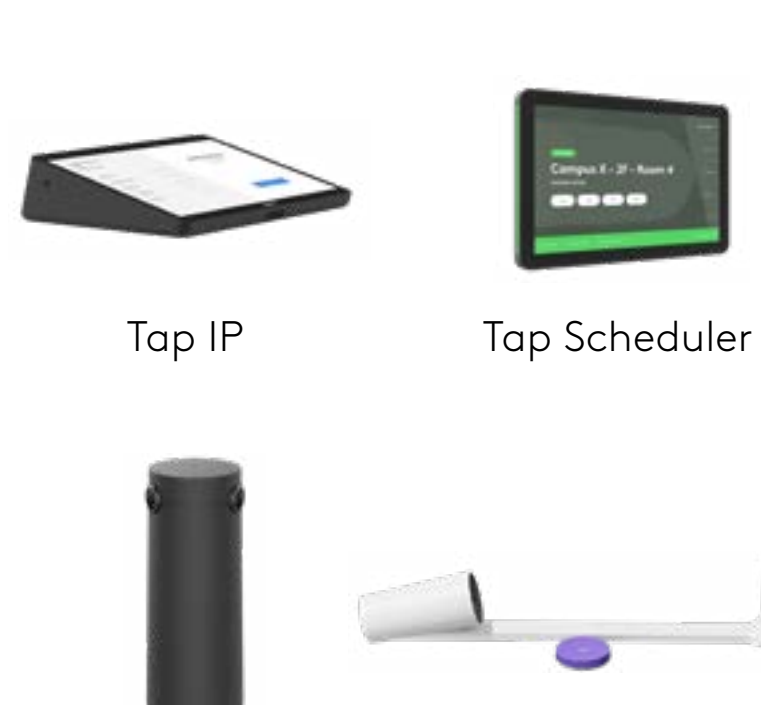

Choose a space like a huddle room or pod and upgrade it with a plug-and-play conference camera. Get faster meeting starts, happier teams, and proof of value in days.

STEP 2

Add smart accessories for consistency

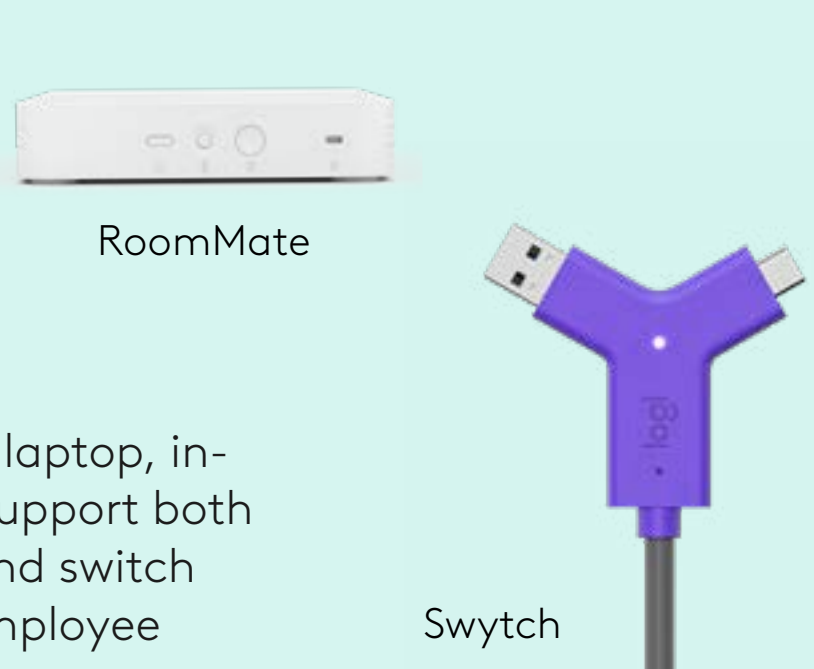

Standardize experiences by adding easy-to-use meeting room accessories, including touch controllers and schedulers, plus remote-top and whiteboard cameras that enhance experiences for remote attendees. This helps to reduce employee confusion and IT support tickets, plus increase meeting room adoption.

STEP 3

Keep teams connected, their way

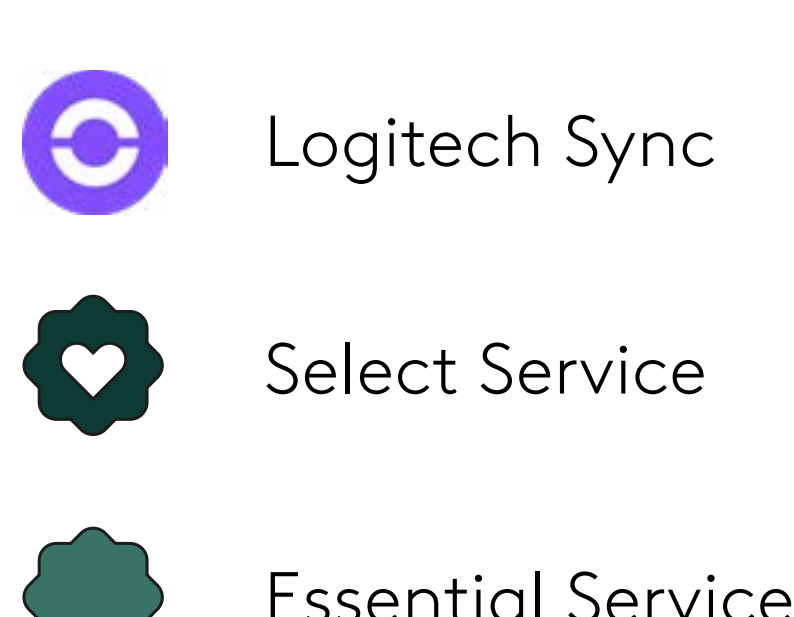

Provide connection flexibility so employees can join meetings via a laptop, in-room PC, or an appliance-based solution. Many Logitech devices support both PC- and appliance-based approaches, so you can start with one and switch later, or support both in different rooms. Add Swytch to connect employee devices with a single cable to keep setup simple and IT support low.

STEP 4

Protect investments and take the pressure off IT

Support your rooms with centralized device management and scalable service options. From proactive monitoring with Logitech Sync to expert support and room usage insights via Logitech Select and Essential plans, IT teams can stay in control, reduce downtime, and make smarter decisions.

STEP 5

Scale success across your spaces

Once your setup proves its value, it's easy to extend and adapt. Replicate your core design in more rooms, from pods to boardrooms, or flex to new use cases like open collaboration and training areas. Devices like RallyBoard 65 can be moved between spaces, while AI-powered video and audio help maintain quality and focus even in dynamic or open-plan environments. With Logitech, it's easy for your solutions for every space to evolve and adapt while keeping IT and employee experiences consistent.

Design the future of meeting spaces today

Discover how easy it is to create meeting rooms that fit your unique needs—seamless, scalable, and ready for the future of work.
